EDUCATION

B.E – Computer Science and Engineering - Third Year
CGPA: 8.42/ 10

KIT-KALAIKARNANINIDHI INSTITUTE OF TECHNOLOGY
2024-2028

EXPERIENCE

DECODE LABS, Remote Workshop

([Link](#))

- Applied Python, Pandas, NumPy, Scikit-learn, and Machine Learning concepts to design and develop AI-based solutions, including rule-based chatbots, recommendation systems, and data classification models, while following structured development practices.
- Strengthened practical expertise in data preprocessing, feature engineering, model development, algorithm implementation, Git/GitHub version control, and debugging, contributing to the successful completion of multiple AI/ML projects in a collaborative learning environment.

PROJECTS

CivicAI Nexus (React.js, MongoDB, Python, Machine Learning, Scikit-learn, NLP, RAG, Speech-to-Text)

([Repo](#))

- Developed an AI-powered multilingual citizen grievance management system that enables users to submit government complaints through text and voice in multiple languages.
- Implemented NLP and machine learning pipelines for automated complaint classification, department assignment, priority prediction, sentiment analysis, duplicate detection, and AI-based complaint summarization.
- Built a mern-stack platform with React.js and MongoDB, integrating RAG-based knowledge retrieval and role-based dashboards for citizens and government officials to manage and track grievances.

AI Phishing Detector (Python, Flask, Scikit-learn, HTML, CSS, JavaScript, Machine Learning, MongoDB)

([Demo](#))

- Developed an AI-powered phishing website detection system that analyzes URLs using machine learning to identify malicious websites in real time.
- Engineered a feature extraction pipeline and trained a Scikit-learn classification model, integrating it into a Flask application for accurate phishing prediction.
- Built a responsive web interface using HTML, CSS, and JavaScript and integrated MongoDB to securely store user queries, prediction history, and application data.

Interactive Web-Based System for Managing Events and Clubs (React.js, Node.js, Express.js, MongoDB, AI Chatbot)

([Demo](#))

- Developed a MERN-stack web application to manage student clubs, events, registrations, member profiles, certificates, and participation activities through a centralized platform.
- Implemented JWT-based authentication, role-based authorization, and REST APIs for secure and efficient management across students, club coordinators, and administrators.
- Integrated an AI-powered chatbot to assist users with event and club-related queries, along with a responsive React.js interface and MongoDB database for reliable data management.

TECHNICAL SKILLS AND CERTIFICATIONS

TECHNICAL SKILLS

Programming Languages: C++, Python, C, SQL

Web Development & Frameworks: Flask, ReactJS, NodeJS, HTML, CSS

AI/ML, Data Analytics: NumPy, Pandas, Scikit-Learn, Machine Learning

Databases, Tools & Core Concepts: MySQL, MongoDB, Git, GitHub, Data Structures & Algorithms (DSA), DBMS, Object-Oriented Programming (OOP)

CERTIFICATIONS

- Principle of Generative AI Certification
- Python Foundation Certification
- Artificial Intelligence Fundamentals
- Prompt Engineering Basics
- Claude Code 101

COMPETITIVE PROGRAMMING

LeetCode: Current Rating: 1838 | Solved Problems: 880+ | Top 9.53% Globally | Highest Rating 1874 |

Codeforces: Current Rating: 1071 | Solved Problems: 300+ | Highest Rating : 1071 | Position : Newbie |

CodeChef: Current Rating: 1572 | Position: 2 Star | Solved Problems: 900+ | Highest Rating: 1608 | Global Ranking: 15676 |

ACHIEVEMENTS

- 36-Hour Hackathon Finalist: Qualified as a finalist in a 36-hour innovation and software development challenge.
- Solved 2700+ algorithmic and data structure problems across competitive programming platforms, participated in 300+ coding contests, and maintained a 590+ -day problem-solving days.
- Achieved a 5-star rating on HackerRank, reflecting proficiency in problem-solving and core programming concepts.

DECLARATION

I solemnly declare that the statements made in this resume, including my academic credentials, technical projects, and skills, are authentic and accurate to the best of my knowledge.
